

# 树脂切割片

## Cut-off & Depressed Center Wheels

### (1) 平行切片 T41 Cut-off Wheels

应用：可用于各种包括碳钢，不锈钢等众多金属的切割和开槽。  
特点：平行切片是目前我司生产最多，最节约成本的树脂切片。  
Application: Ideal for metal slotting and cut-off applications on a variety of metal applications from carbon to stainless steels.  
Features: Maximum productivity and low costs cutting wheel.

### (2) 跋形磨片 T27 Depressed Center Wheels

应用：可用于各类金属加工作业。  
特点：钹型砂轮选用特殊品质的棕刚玉磨料，砂轮性能稳定，性价比高。  
Application: Ideal for a variety of metalworking applications.  
Features: Depressed Center Wheels feature quality aluminum oxide abrasive for consistent, maximum performance of aluminum oxide wheels at a competitive price.

### (3) 切磨片 T42 Depressed Center Cutting & Grinding Wheels

应用：可用于各类手工作业及非平面，非固定的加工。

特点：整片覆盖高强度的玻纤网，适用于各种操作环境。

Application: Ideal for any operation where the grinder is hand-guided (portable) or where the work is not securely clamped.

Features: These reinforced cut-off wheels contain strengthening fabric or filament throughout the entire diameter of the wheel.

(4) 超薄切割片 T41 Ultra Thin Cut-off Wheels

应用：可用于各项金属切割工序。

特点：超薄切片提供给您最顶级的切割手感。

Application: Ideal for a variety of metal application.

Features: The ultra thin cut-off wheels line gives you a top tier, highest-performing line.

(5) 可弯曲磨片 T27a Flexible Grinding Wheels

应用：适用于各类小型磨削工序。

特点：可弯曲砂轮由白刚玉和单晶刚玉制成，结构柔软。

Application: Ideal for stacking and hardening of resin cutting wheel (disc).

Features: Stable quality, high durability, non-deformation, moderate tenacity, maintenance-free, easy operation, complete in specifications.
